

# Social Media: Your Child's Digital Tattoo

## A WIRED FAMILY

Stephen J Smith, President of A Wired Family, LLC, has presented this powerful presentation to nearly 500,000 students, parents, school administrators and mental health professionals over the last 10 years. Through the use of video, animation, news stories and Steve's personal experience working with students, law enforcement, parents and mental health professionals, the program covers:

- The real apps that children are using in our area
- How and why apps are purposely developed to become addictive
- How pornography has become an issue with children as young as 11
- How your child's privacy is often compromised and used against them
- The future career and educational impact of sexting and other on-line behavior
- How the overuse of social media, gaming and bullying might impact mental health.
- How parents and children can work together to control these trends

Steve started his career as a high school teacher and coach before spending more than 20 years in the Information Technology industry. Steve also spent an additional 25 years in the world of film, video and interactive media development. He started A Wired Family in 2009 while Director of Educational Leadership at a large IT Consulting Company. Upon

his retirement in 2017, he and his wife Mary Beth, a teacher with 34 years experience, continued the program, reaching thousands of children and adults throughout Ohio, Indiana and Kentucky each year. Steve regularly appears on TV and radio addressing the issues of technology on family and society.

Steve's book, **SOCIAL MEDIA: YOUR CHILD'S DIGITAL TATTOO** is now available on Amazon.
